Singapore General Hospital

Singapore General Hospital (SGH) is the largest acute tertiary hospital in Singapore and was the second largest hospital in the world to achieve Joint Commission International (JCI) accreditation. SGH has about 816 highly qualified doctors and 1521 beds, and is widely recognized as an innovation hub for medical treatments and methodologies. The Hospital offers team-based quality patient care at par with the world's best hospitals. SGH Campus allows patients ready access to more than 30 specialty services including - Haematology, Renal Medicine, Nuclear Medicine, Orthopedic Surgery, Pathology and Plastic Surgery (Burns); and, are established as national referral centres. SGH is proud of its comprehensive range of allied health services, including - Clinical Diabetics, Medical Social Services, Occupational Therapy, Pharmacy, Physiotherapy, Podiatry and Speech Therapy.

National Heart Centre Singapore

National Heart Centre, Singapore (NHCS) the first heart hospital in Asia to receive the Joint Commission International (JCI) accreditation performed Asia's first percutaneous closure of the left atrial appendage using the Watchman device first robotic hybrid operating theatre in Southeast Asia. NHCS introduced magnetic navigation system for complex arrhythmias, first in Southeast Asia. NHCS performed first Heart Mate II implantation in Singapore, first heart transplant and lung transplant in Singapore. NHCS & SGH successfully performed Asia's first combined heart and liver transplant. NHCS successfully performed Asia's first percutaneous aortic valve replacement.

National Cancer Centre Singapore

National Cancer Centre Singapore (NCCS) is a national and regional centre offering a non-stop holistic patient-centred clinical service directed at the prevention and treatment of cancer, including thoracic, hepatobiliary, pancreatic, head and neck cancers. The centre has the largest pool of internationally qualified oncologists in Singapore. Supported by strong nursing and allied health professionals, they work together to achieve the best outcomes for patients, comparable to those of international centres.

National Neuroscience Institute Singapore

National Neuroscience Institute (NNI) is the national specialist centre for the management and care of neurological diseases, providing treatment for a broad range of illnesses that affect the brain, spine, nerve, stroke and muscle.

This comprehensive all in-one facility will be able to enhance a neurosurgeon's surgical planning and exploration experience, especially for complex neurosurgical operations. It will allow the surgeons to look at the precise images of a patient's brain before, during and right after surgery.

Singapore National Eye Centre

Singapore National Eye Centre (SNEC) spearheads and coordinates the provision of specialized ophthalmological services and is the designated national centre for eye services in Singapore.

High quality one-stop personalized service for patients who require eye care services, the staff of 450 highly specialized medical, paramedical and administrative personally at SNEC currently manages 14,000 major eye surgeries and 13,000 laser procedures annually. These include more than 10,000 phaco cataract surgeries, 7000 LASIK procedures and 6000 laser procedures for diabetic retinopathy and glaucoma.
